

PROTECT YOUR ENVIRONMENT

Epson's Business inkjet printers provide an environmentally sound alternative to laser printers.

With
no ozone gas
you can protect your environment.

Epson is leading the way in sustainability

- with innovative, future-facing technology that supports your ongoing environmental, economical and societal performance

Understand the importance of clean technology

- The Paris Agreement of 2015 is the first universal climate deal – a worldwide commitment to a sustainable future

So, how can you build a sustainable future?

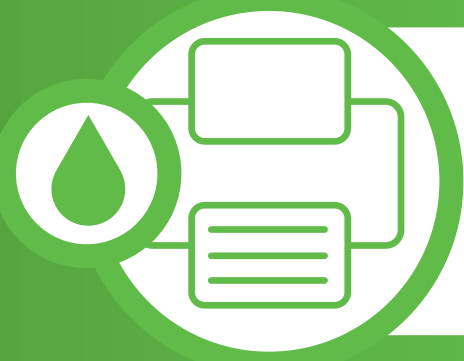

You can protect your environment

by eliminating ozone gases

when you make the switch to

Epson Business inkjet printers

The WorkForce Pro inkjet range is the new 'triple bottom line' in business printing

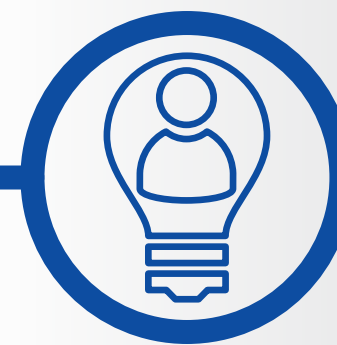

It can improve:

environmental performance

economic performance

societal performance

and invest in technology supported by the Epson25 vision to

help protect the future

Let us help you make the switch for a more sustainable future
